Website upgrades

What is already done, what we are building now, and what we can add next. Each idea has a short reason so it's easy to decide.

Already done

- ✓ **New fast website** with the same page addresses as before, so Google rankings are kept.
- ✓ **Our own admin panel** to edit trips, blogs, pages, photos, reviews, team and the homepage.
- ✓ **Online booking and payment** with WeTravel, plus discount codes.
- ✓ **Professional emails** to travellers and the office, a newsletter design and gift vouchers.
- ✓ **Strong security:** two-step sign-in, protection against hackers and password guessing.
- ✓ **SEO fixed:** better page titles and descriptions; every technical check passes.
- ✓ **Works on phones:** the website and the admin.
- ✓ **Safe updates:** automatic backup before every change, and an instant undo.

Just finished (each one has an on/off switch in Admin → Settings → Features)

Feature	What it does	Why it helps
On/off switches	Turn any feature on or off from the admin.	Full control without a developer.
Reminder for unpaid bookings	If someone starts a booking but doesn't pay, they get a friendly reminder after 24 hours.	Brings back customers who forgot or got distracted.
WhatsApp alerts	The office gets a WhatsApp message for every new booking, enquiry and payment.	Faster replies; you never miss a customer.
tawk.to chat details	When someone books or asks a question, their name, email and booking number show in the chat.	Your team knows who they are talking to.

Reviews after the trip	Travellers get an email to rate the trip and write a review. You approve good ones and they appear on the trip page.	More real reviews mean more trust and better Google results.
Traveller account	After payment, and only when you approve it, the traveller gets a private account (my.basecampadventure.com) to see their trip and payments, upload passport and insurance, add flights and download documents. It closes itself after the trip.	No more chasing documents by email; everything for each trip is in one safe place.
German, French, Spanish	Our 20 most popular trips in three more languages, each language switchable on or off. A native speaker should read them once before they go live.	Big trekking markets; people book more in their own language.

Ideas we can add next

#	Feature	What it does	Why it helps	Size
1	**Fixed departure dates**	Group dates on each trip with seats left, e.g. "12 Oct, only 3 seats left".	"Only a few seats left" is the strongest reason to book now.	Medium
2	**Prices in the visitor's money**	Prices in euros, pounds or Australian dollars next to US dollars.	Travellers understand the price straight away.	Small
3	**Trip finder quiz**	A few easy questions (days, fitness, budget, month) that suggest the best 3 trips.	Helps first-time visitors who don't know Nepal.	Small
4	**Compare trips**	Two or three treks side by side: days, height, difficulty, price.	Helps people who can't decide.	Small
5	**Emails before the trip**	Automatic emails 30 and 7 days before departure: packing list, visa, airport pickup.	Travellers arrive ready; the office saves time.	Small
6	**Online safety forms**	Waiver and medical form signed online before arrival.	No paper forms in Kathmandu.	Small
7	**Sales dashboard**	Charts for bookings, money received, best-selling trips, where customers come from.	See how the business is doing at a glance.	Medium
8	**Departure list (PDF)**	For each departure: who is going, rooms, food needs, guide and porters.	The field team gets everything on one sheet.	Medium
9	**Guide planner**	Choose which guide leads which departure; see who is free.	No double bookings of guides.	Medium

10	**Quote maker**	A tailor-made price offer as a nice PDF with a "Pay deposit" button.	Faster, more professional replies to custom requests.	**Medium**
11	**Month pages**	Pages like "Everest Base Camp in October" made from our trips and guides.	People search like this; brings visitors from Google.	**Small**
12	**Save a trip**	Visitors save trips they like and get a reminder email later.	Brings visitors back to book.	**Small**
13	**Trip of the month**	A banner to promote one trip, set from the admin.	An easy way to push a trip that needs bookings.	**Small**
14	**Weather and best months**	A simple chart on each trip showing the best months to go.	Answers the most common question before people ask.	**Small**
15	**Trip brochure (PDF)**	A good-looking PDF of each trip with photos and the altitude chart.	Easy to share with friends and family who travel together.	**Small**
16	**More languages**	Chinese, Japanese, Hindi and others, after German, French and Spanish.	Reach new countries once the first three work well.	**Medium**

Size: Small = a few days. Medium = about a week or more.

Our suggestion for what to do first

1. **Fixed departure dates**: brings in the most bookings.
2. **Emails before the trip** and the **online safety forms**: save the office a lot of time.
3. **Sales dashboard**: shows clearly what is working.
